

TEXAS RIDESHARE PROGRAM

TEXAS VANPOOL CENSUS

**TEXAS TRANSPORTATION INSTITUTE
AND
GOVERNOR'S OFFICE OF BUDGET AND PLANNING
IN COOPERATION WITH
THE U.S. DEPARTMENT OF ENERGY**

AUGUST 1988

The Texas Vanpool Census

August 1988

The results presented in this issue of the Vanpool Census are based upon a survey and analysis conducted during the spring and summer of 1988. In contrast to what is happening on the east and west coasts, interest in vanpooling (as well as other forms of ridesharing) continues to wane in Texas. This is usually thought to be a direct result of the economic climate in the state and of the relatively low cost of gasoline, as compared to the situation that existed in the late 1970's and early 1980's.

The charts and tables toward the end of this Census show the history of vanpooling in the State from 1974 to the present. These data were compiled from previous issues of the Census. The estimates of the energy savings resulting from the program are based upon current program size and certain operational data collected in 1985-86.

Individual program descriptions are based upon the survey conducted earlier in the year. Any questions concerning these individual vanpool programs should be directed to the indicated coordinator of that program.

Questions concerning the state-wide program and/or rules and regulations which may affect vanpooling should be directed to either:
