

TO WIN:

Be the first person/team to match all of your GAME SHEET with DRAW CARDS.

TO PREPARE THE GAME:

Each player will need one set of PERSONAL DRAW CARDS (24 cards). Place the DRAW CARDS in a stack face down. Each player will have a stack of cards in front of him/her. Now each player needs one GAME SHEET. Place the GAME SHEET right in front of each player. See below:

TO PLAY:

All players take the top card from their personal DRAW CARD stack at the same time. Each player reads their card silently. Everyone will be playing at the same time!

If the card matches a word on your game sheet, you will place the card face up over the matching word. If your card does not match a word on your game sheet, you will place your card face down in a pile to your right.

Once you have placed the card either on your GAME SHEET, or in the pile to your right, go ahead and start your next turn. Remember you are trying to be the first person to have all of your cards matched on your GAME SHEET.

Next, draw a card from the stack of your neighbor's discarded cards on your left. If there are no neighbor's discards to draw from, draw from your personal stack. Keep drawing (choosing first from your neighbor's discards, if available) as you play.

Continue playing until a player has all of their words matched on their game sheet. When a player has all matches they will say "SAFE." This signals the end of the round. Check to confirm that player had correct matches.

This game can continue for as many rounds as you choose.

*****SUGGESTED NUMBER OF ROUNDS: 5**
